

MACHINED PARTS

With 4-axis machining capability and turning centers, Harley & Son can tackle some of your toughest parts. Aluminum, titanium, brass, bronze, aircraft alloys, phenolic, delrin, stainless steel, and exotic alloys – these are not a problem for Harley & Son. After machining, the Company can anodize, plate, powder coat, or paint to customer specifications.

CUSTOM MANUFACTURING

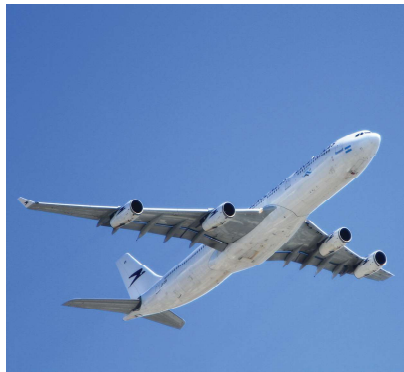

State-of-the-art feature-based CAM software allows Harley & Son to program the toughest parts directly from customer CAD models. Supported formats include STEP, SolidWorks, CATIA, Unigraphics, Autodesk Inventor and others.

COMMITMENT TO QUALITY

Harley & Son is committed to supplying its customers with high-quality parts. Certifications to AS9100C and ISO 9001:2008 highlight the Company's commitment to maintaining the highest quality.

Our Capabilities

- Precision CNC Machined parts
- Sub-assemblies
- Turning
- Tooling
- Fixtures
- Electronic Housing Units
- Valve Bodies
- Complex hog out of Parts
- Drive links
- Brackets
- Assemblies for production
- Hardware
- Chem film
- Anodizing
- Cad-Plating
- Overlays
- Heat Treating
- Welding
- Powder Coating
- Paint

SERVICES AVAILABLE

- [Technical Support](#)
- [Installation and Setup](#)
- [Maintenance](#)
- [Application Support](#)
- [Hardware Support](#)
- [Guaranteed Warranty](#)

Materials we work with

- Aluminum and aluminum alloys
- (6061, 7075, etc.)
- Stainless steel (303, 304, AMS-5629)
- Titanium
- Brass
- Bronze
- Aircraft alloys
- Exotic alloys
- Plastics (delrin, phenolics)
